

Health Alliance

Connecting & Involving Communities

Supported by Networks Involving Communities in Health Improvement (NICHl)

The Health Alliance provides an opportunity for communities, voluntary and statutory sectors to network, share information and best practice, engage in evidence based health improvement, access training and capacity building opportunities and contribute to sharing the health improvement agenda.

The Health Alliance was developed within the Networks Involving Communities in Health Improvement (NICHl) project. The aim of the NICHl project is to support the involvement of communities in improving health and social wellbeing and reducing health inequalities.

The NICHl project operates across the Northern Locality and is managed by the Community Support Networks.

For a wide range of resources and support available to create healthier communities, log onto the Health Alliance website

www.healthallianceni.com

From programmes and events, to training and funding, you can keep in touch with the information that is most relevant to you and your local community.
